Updates on open questions

- Conditional in GT4Py stencil changing stencil extent / halo
  - Not working.
  - Tested with small example.
  - Confirmed with Stefano:
    - "Unfortunately, if-conditionals are not supported by GT4Py ... Gridtools/C++ nicely supports if-conditionals, but - to my knowledge - only in the vertical direction. However, this functionality has not been exposed to the Python layer yet."

Completed Steps - Milestone

- Source graph generation model including thesis chapter.
  - Thesis text on overleaf.
  - Code works, used to generate examples, probably will need some small changes to fit with remaining library features.
- Run first test case scaled for Greina on single node and take measurements.
  - First measurements taken.

Serial Runtime - 100 time steps
Burger's eq. - Zhao forward-backward-stencil

Memory Requirements - 100 time steps
Burger's eq. - Zhao forward-backward-stencil
